FILTRE/FILTER/FILTRO

THE COKIN FILTERS

cokinlight®

Cokinlight® Filters are manufactured in France to the most sophisticated known optical technology relating to the use of organic glass made of CR 39.

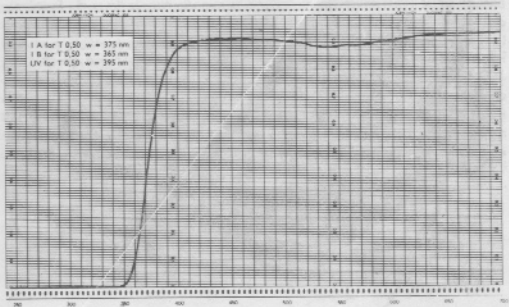

The multiple qualities of CR 39 organic glass allow it to be used now wherever the newest optical techniques are required.

The numerous qualities of CR 39 may be summarized as follows :

- Excellent optical transmission equalling the best mineral glasses ;
- Long-lasting optical qualities ;
- Twice as light as mineral glass ;
- Particularly resistant to scratches and knocks ;
- Unaffected by chemical agents and cleaning solvents.

That is why we decided to offer you the Cokinlight® Filters range, which will protect your lenses without affecting their accuracy, sharpness and colour reproduction, by suppressing the ever-present ultra-violet rays harmful to the quality of your pictures.

THE NEW COKIN LOOK

I have conceived and created the Cokin filter-guide, here available in miniature size, to allow you to enter the wonderful world of the Cokin Creative Filter System.

The heart of my system : a universal filter-holder adaptable to all your lenses by an adaptor ring and a comprehensive range including more than 100 filters, which may be combined together, producing millions of effects.

For you to look at the world in a new way, like a pro, please do not hesitate to ask for advice from your Cokin specialist dealer.

He is the expert and will guide you in the choice of your first of many Cokin Creative Filters.

Jean Coquin
